4. FIRST AID MEASURES

EYES: Avoid contact with eyes. If contact occurs, flush immediately with clean flowing water, low pressure and lukewarm if possible. After an initial flush, check for and remove contact lenses if present. Continue flushing for 15 minutes occasionally lifting upper and lower eyelids. Seek medical attention.

SKIN: Remove contaminated clothing. Wash exposed areas with soap and water. Seek medical attention if irritation develops and persists. Wash contaminated clothing before reuse.

INHALATION: Avoid inappropriate handling that may result in the generation of aerosol dusts. If inhaled, move away from contaminated area to fresh air. Seek medical attention if person has difficulty breathing, chest discomfort, or exhibits any other signs of allergic response.

INGESTION: Causes irritation to mouth and throat. If swallowed, do not induce vomiting. If person is conscious, give 1-2 glasses of water to drink. Never give anything orally to an unconscious person. Seek medical attention.

5. FIRE FIGHTING MEASURES

Avoid generation of airborne dust. Wear skin, eye and respiratory protection (See Section 8). Ensure sufficient ventilation. Remove as much material as possible by mechanical means (i.e., vacuum). Dilute remainder with plenty of water (avoid high pressure washes that can lead to the formation of aerosols) and collect in a waste system.

7. HANDLING AND STORAGE

Store in original containers in a cool dry place. Avoid formation of airborne dusts and contact with product during handling and clean up (See Personal Protection in Section 8). This product will react with acids to yield carbon dioxide gas, which can accumulate in confined spaces. Do not enter confined spaces until they have been well ventilated and carbon dioxide levels have been determined to be safe.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: Use local exhaust if dust level exceeds the recommended exposure limit.

EXPOSURE LIMITS: Product is a powder - 10 mg/m³ Total, 3 mg/m³ respirable (ACGIH-PNOC)

Enzyme-0.00006 mg/m³ (ACGIH)

(PNOC = Particles Not Otherwise Classified)

RESPIRATORY PROTECTION: Respiratory protection is required where engineering and work practice controls are not able to sufficiently control airborne exposure below the recommended limit. If exposure exceeds the recommended limit, wear a NIOSH approved air purifying respirator with a HEPA filter cartridge.

PROTECTIVE GLOVES: General purpose recommended for normal exposure to material. Use impermeable gloves for repeated or prolonged contact with powder or where solutions are involved.

EYE PROTECTION: Wear safety glasses with side shields or safety goggles. Do not wear contact lenses.

OTHER PROTECTIVE CLOTHING OR EQUIPMENT: Clean full cover clothing is sufficient. Local eye wash is recommended.

PROTECTIVE WORK/HYGENIC PRACTICES: No special work requirements with respect to chemical exposure other than those noted above.

10. STABILITY AND REACTIVITY

CHEMICAL STABILITY: Stable.

CONDITIONS TO AVOID: Direct exposure to prolonged high humidity or other moist/damp conditions may cause product to cake, react and form oxygen.

INCOMPATIBILITY WITH OTHER MATERIALS: Sodium percarbonate will react with water to form oxygen. Heavy metals and reducing agents. Reacts with acids to yield carbon dioxide.

HAZARDOUS DECOMPOSITION PRODUCTS: Thermal decomposition will emit carbon dioxide, sulfur oxides, sodium oxide and oxygen.

HAZARDOUS POLYMERIZATION: Will not occur.

11. TOXICOLOGICAL INFORMATION

EYE EFFECTS: A severe eye irritant based on the alkaline nature and level of surfactants.

SKIN EFFECTS: Not a primary skin irritant. The FHSA Primary Dermal Irritation Index (PDII) on a similar product tested unoccluded for 4 hours was <1.0. Other similar carbonate-based detergent formulations have typically scored between 2.0-3.0 in 24 hour occluded tests.

ACUTE ORAL EFFECTS: Slightly toxic; LD₅₀ estimated to be ≥ 3.0 g/kg. The principal component, sodium carbonate, has a reported LD₅₀ of ranging from a low of approximately 3000 mg/kg to a high of approximately 5000 mg/kg..

INHALATION EFFECTS: Inhalation of dust may cause respiratory allergy in susceptible individuals. Inhaled dust or aspirated product from ingestion may cause upper respiratory irritation and delayed pulmonary effects.

12. ECOLOGICAL INFORMATION

TOXICITY: No data available.

PERSISTENCE: Not expected to persist in the environment.

BIOACCUMULATION: Not expected to bioaccumulate in the environment.

13. DISPOSAL CONSIDERATIONS.

Landfill in accordance with all local, state and federal environmental regulations. Local and state laws may differ from federal, so be sure to consult with appropriate agencies for specific rules.
