## **Pro-Smoke™**

Smoke Odor Neutralizer

This is a water soluble odor counteractant that chemically neutralizes stale fire and smoke odors, cooking odors, mold & mildew odors, and many others by eliminating their presence through micro-encapsulation. Prosmoke

continues to work long after the initial pleasant fragrance has dissipated. Prosmoke is excellent for use in routine

mopping and cleaning, carpet shampooing or a simple hand sprayer. For longer lasting odor neutralizing,

fogging/humidifying and treatment of HVAC filters is recommended.
