4. FIRST AID MEASURES

Inhalation:

Move to fresh air.

Skin contact:

If on skin, wash with soap and water. Get medical attention if irritation persists.

Eye contact:

In case of eye contact, hold eyes open and IMMEDIATELY rinse eyes thoroughly with plenty of water. Remove any contact lenses and continue rinsing for at least 15 minutes. If irritation occurs or persists, get medical attention.

5. FIRE-FIGHTING MEASURES

Flash point:	FLAMMABLE AEROSOL.
Flammability Limits in Air:	
Lower:	No information available.
Upper:	No information available.
Autoignition temperature:	No information available.
Suitable extinguishing media:	As suitable for surrounding fire.
Extinguishing media which must not be used for safety reasons:	No information available.
Specific hazards:	Extremely flammable. All aerosols are pressurised products and will eventually burst if exposed to very high temperatures, or if involved in a fire. They will then release the propellant hydrocarbon gas which is extremely flammable.
Unusual hazards:	Move containers away from fire if possible and safe to do so. Use water spray to cool fire exposed containers. Provide shielding for personnel exposed to venting, rupturing or bursting containers
Special protective equipment for firefighters:	As in any fire, wear self-contained breathing apparatus, pressure-demand, MSHA / NIOSH (approved or equivalent) and full protective gear.
Specific methods:	Standard procedure for chemical fires.

NFPA: **Health:** 2 **Flammability:** 3 **Instability:** 0

HMIS: **Health:** 2 **Flammability:** 3 **Reactivity:** 0

Key: Personal Protection Index = B.
(Also see Sections 3 & 8)

6. ACCIDENTAL RELEASE MEASURES

Personal precautions:	Ensure adequate ventilation.
Environmental precautions:	Do not allow material to contaminate ground water system.
Methods for cleaning up:	Eliminate all sources of ignition and ventilate the area with equipment rated for use in flammable environments.

Small spillages of up to 1 litre may be cleaned up with a mop or an absorbent cloth. Medium spills of up to 5 litres should be absorbed with sand, earth, sawdust or other inert material and transferred to a suitable container for disposal.

Large spills should be diked, contained and collected for later disposal according to local, provincial, state or federal regulations.
Full protective equipment and self-contained breathing apparatus (SCBA) is required to be worn by all emergency responders and clean-up personnel.

7. HANDLING AND STORAGE

Handling:	Use with adequate ventilation.
Safe handling advice:	<p>FLAMMABLE AEROSOL !</p> <p>CAUTION: Contents under pressure. DO NOT puncture or incinerate. DO NOT expose to heat or store above 50° C (120° F), as container may burst</p> <p>Keep away from open flames, hot surfaces and sources of ignition.</p> <p>Use only in well-ventilated areas.</p>
	<p>NOTE TO PARENTS: Intentional misuse by deliberately concentrating and inhaling aerosol products may be harmful or fatal. Read label instructions carefully.</p>
Storage:	<p>CONTAINERS SHOULD BE KEPT OUT OF REACH OF CHILDREN.</p> <p>Pressurised container. Protect from sunlight and do not expose to temperatures exceeding 50° C. Do not pierce or burn after use. Keep away from all sources of ignition.</p> <p>Fires involving flammable aerosols are severe and can spread very quickly. Warehouses and stores containing aerosols should therefore be separated from other areas by a fire resistant construction of at least one half hour duration. Stores should be well ventilated, particularly at low levels. The natural ventilation in a large open warehouse building will normally be suitable. Avoid the storage of aerosols in basements where practicable.</p>
Incompatible products:	Do not store near high heat sources, sparks or open flame. The propellant and contents are extremely flammable.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Engineering measures to reduce exposure:	For occupational exposures, ensure adequate ventilation.
<u>Personal Protective Equipment</u>	
Respiratory protection:	<p>None required under normal use conditions.</p> <p>Emergency responders should wear self-contained breathing apparatus (SCBA) to avoid inhalation of vapours generated by this product during a spill or other clean-up operations.</p>
Hand protection:	<p>None required under normal use conditions.</p> <p>Avoid contact with the skin.</p> <p>Emergency responders should wear impermeable gloves.</p>
Skin and body protection:	Usual safety precautions while handling the product will provide adequate protection against injury or irritation. Follow product label instructions.
Eye protection:	<p>None required under recommended product use.</p> <p>Eye irritant.</p> <p>Avoid spraying into eyes.</p> <p>Read product label instructions carefully.</p> <p>Emergency responders should wear full eye and face protection.</p>
Hygiene measures:	Avoid contact with skin, eyes and clothing.
