ALERO PT
Passive Technology
Air Care Dispenser

- Install the ALERO dispenser ensuring it is at a minimum height of 1.8 meters (6 feet) in an area that provides good airflow. The best locations are where moving air will disperse the fragrance throughout the volume of the room i.e. 1 to 2 meters (3-6 ft) within the room entrance.
 - Using the supplied key open the dispenser and insert an ALERO refill, (refill not included). Once refill is properly inserted close the dispenser cover.
 - * The ALERO optional fan held within the dispenser helps to circulate fragrance in rooms where there is limited air flow & requiring extra fragrance performance (optional fan sold separately).
- *Patents Pending
