

6 QT or 10 QT HEPA Filtered Backpack Vacuums 10 QT ULPA (TYPE F) CERTIFIED Backpack Vacuum

The Atlas backpack vacuum series from EDIC provide cleaning professionals with a comfortable, ergonomic and high performance solution to daily maintenance routines. Feature for feature, they simply defy the competition!

COMFORT

Atlas backpack vacuums are light-weight and easy for anyone to handle. The ergonomically-designed Velcro straps at the chest and hips result in a comfortable fit for any sized operator. A special slide adjustment hooks the shoulder straps together for a higher range of motion. The on/off switch is conveniently located at the hip level and mounted on top for unparalleled ease of operation.

PERFORMANCE

Our unique airflow design provides quiet operation and the baffled exhaust goes out the back, away from the operator, for a higher level of comfort. The Atlas comes with our extraordinary Ultrastat™ 3-ply composite HEPA filters treated with an anti-microbial agent that provides exceptional airflow even when full, allowing for greater productivity. This exclusive filter provides HEPA filtration and is fitted with a durable plastic rim for an airtight seal and the seams are sonically welded (as opposed to glued). The result is higher dust retention, and a much longer filtration cycle with improved durability.

ULPA (Type F) Certified

The Atlas ULPA unit comes standard with an ULPA (Type F) Certification or you can convert your standard Atlas 10 qt. to an ULPA Certified vacuum with the optional Atlas Conversion Kit.*

ULPA is an acronym for “Ultra Low Particulate Air (filter)” An ULPA filter can remove from the air at least 99.999% of dust, pollen, mold, bacteria and any airborne particles with a size of 100 nanometres (0.1 µm) or larger. This means the Atlas ULPA unit can be used in critical environments or help your facility meet its LEED standards for this criteria.

ATLAS

BACK PACK VACUUMS

Features & Benefits

- Longer exhaust chamber and diffused exhaust air for quiet operation
- All Atlas units come with an Ultrastat™ HEPA filter for better filtration efficiency, greater dust retention and longer useful life than Micro filter bags. Ultrastat™ HEPA filter uses a revolutionary synthetic material allows greater air flow even when the bag is full providing HEPA filtration for all units
- 3-position hip adjustment for wider or narrower hips allows the unit to sit more comfortably on the hips
- Ergonomically designed harness with multi-adjustable settings for optimum comfort
- Lightweight – only 10 lbs.
- Hip-mounted switch results in easy on/off
- Precision-molded cloth filter bag rim holds it's shape to prevent collapsing inside the unit when the bag is full
- Optional Conversion Kit available for 10-qt units. Converts Atlas 10 qt. with HEPA filtration to an ULPA (Type F) Certified Vacuum*
- Available in 220-volt
