

High Performance Specialty Tools

Advanced Performance Specialty Tools
for Moisture-Controlled Cleaning

MOISTURE CONTROL TECHNOLOGY

CFR's patented high performance hand and floor tools atomize high velocity solution to "scrub" each individual fiber and simultaneously recover this solution to prevent over wetting. They clean carpeting, furniture, upholstery, office partitions and fabric wrapped wall systems better than traditional extractors systems. Additionally CFR's unique tool design provides total solution control with all the tools in the offering, creating multi-use workstations. For the ultimate in fabric hygiene, choose CFR environmental cleaning systems.

UNIQUE RAPID RECOVERY ATOMIZATION PROCESS PREVENTS OVER WETTING

CFR's patented cleaning technology is distinctively different from other cleaning systems. Simultaneously occurring within the vacuum shoe of our specialty tools, CFR's Rapid Recovery Atomization process cleans and recovers solution all in one step to ensure that moisture never rests on the carpet. The atomized, high-speed cleaning solution is sent through our specialty tools and works as an agitator, cleaning the fibers better than a brush without damaging the carpet. Soil is flushed from the carpet fibers at up to 750 p.s.i. and 1.4 gallons per minute. To get the same level of clean with a traditional extractor, you have to go over the same area three to four times! What's more, it's virtually impossible to over wet carpet or fabrics. The unique rapid recovery process ensures that moisture, contaminants, odors, mold and allergens are controlled, delivering a healthier indoor environment.

RAPID RECOVERY ROLLER WANDS

11" extraction wand

This high performance "Roller Wand" is easy to operate on all carpet surfaces, it is especially recommended for medium to higher nap carpets. Ergonomically designed for comfort, this wand is available in an industry standard reverse operating type (Type R) or in a forward motion operating type (Type F) for maximum results and productivity.

Made of high quality stainless steel this tool will provide years of durable and heavy duty performance. The patented design provides water atomization and high performance recovery for complete solution control and minimum dry time.

RAPID RECOVERY GLIDE WANDS

11" extraction wand

This high performance "Glide Wand" can be used on all carpet surfaces, however it is preferred by most cleaning professionals on short-nap carpets. Ergonomically designed for comfort, this tool works in a forward motion for maximum results and productivity.

Made of high quality stainless steel, this tool will provide years of durability and heavy duty performance. The patented design provides water atomization and high performance recovery for complete solution control and minimum dry time.

RAPID RECOVERY HARD SURFACE WANDS

11" scrub and vacuum wand

The "Hard Surface Floor Tool" adds tremendous versatility to all CFR extractors turning them into workstations by providing excellent results for all types of hard surface cleaning including tile and grout.

Made of high quality stainless steel this tool will provide years of durable/heavy duty performance. The patented design provides water atomization and high performance recovery for complete solution control and minimum dry time.

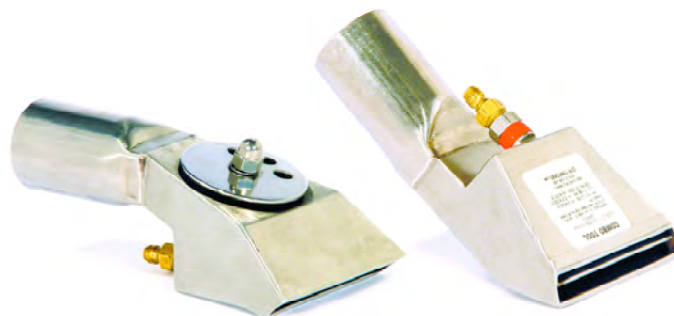

COMBINATION HAND TOOLS

3" and 5" hand tools

The "3" and 5" Combination Tools" are specifically designed for cleaning upholstery, small fabric pieces and high performance general spotting. The fully adjustable air in-let feature makes it easy to clean even fine fabrics. For maximum results and the very fastest dry time consider the combination tool with additional nozzles.

Made of high quality stainless steel these tools will provide years of durability and heavy duty performance. The patented design provides water atomization and high performance recovery for complete solution control and minimum dry time.

SPECIAL PURPOSE HAND TOOL

7.5" hand tool

The "Special Purpose Hand Tool" provides amazing results for stairs, office panels, fabric wall coverings and other large flat fabric covered surfaces. Add the lightweight "Extension Wand" and reach an additional 4 ft. to clean those hard to reach areas!

Made of high quality stainless steel these tools will provide years of durability and heavy duty performance. The patented design provides water atomization and high performance recovery for complete solution control and minimum dry time.

HARD SURFACE HAND TOOLS

7" hand tool

Especially designed for those tight hard surface areas including stairs and walls. Add the lightweight "Extension Wand" and reach an additional 4 ft. to clean those hard to reach areas!

Made of high quality stainless steel these tools will provide years of durability and heavy duty performance. The patented design provides water atomization and high performance recovery for complete solution control and minimum dry time.

EXTENSION TOOL

49" Extension

This 49" lightweight wand can be quickly attached to select hand tools to give greater reach and the ability to do hard floors of all kinds.

VACUUM HYDRAULIC HOSE

Insider hoses from 16' to 33'

Specially designed hose assemblies contain an on/off valve, the fluid hydraulic line and the vacuum hose. These assemblies come in 16' and 33' lengths with an extension length of 25'. Available in both flexible and crush proof.

HIGH PERFORMANCE SPECIALTY WANDS AND TOOLS FOR HEALTHIER BUILDINGS

CFR's innovative and patented solution and recovery atomization process controls moisture, sprays, cleans and recovers all in one step occurring within our tools.

- 1. Faster:**
 High-speed cleaning solution is atomized in the unique and patented vacuum shoe to create a high-velocity, continuous flow of cleaning solution that rapidly injects and recovers soil and water from the carpet fibers. CFR's roller and glide wands are feather-light for maximum results and productivity.
- 2. Cleaner:**
 At the exact same time, the cleaning solution is being atomized within the vacuum shoe, the solution is simultaneously suctioned back out of the carpet fibers, ensuring the cleaning solution never comes to rest on the backing. The result? More water is being pushed through the carpet fibers without soaking the backing and pad. Moisture is controlled, carpets dry faster and your space is clean and ready for use.
- 3. Greener.**
 Our light-weight, high-performance roller wand, glide wand and hand tools are designed for superior ergonomics, comfort and durability. CFR's Rapid Recovery Atomization Process cleans and recovers solution all in one step to ensure that moisture never rests on the carpet.

Patented High Performance Atomization Process
