CXV30 Wide Area Vacuum

Brush height adjustment

The CXV30 has five pile height adjustment settings. The user may change settings with a simple foot pedal.

Ease of use

Whether you are cleaning a convention center, lobby, or hallway, the CXV30 tackles large area vacuuming projects with ease. The handle can be adjusted for operator comfort. A 75 ft. cord minimizes interruption for outlet changes.

Four stage clean-air filtration

The Cimex-USA CXV30 Wide Area Vacuum delivers true clean-air filtration down to .3 microns with 98.36% efficiency thanks to its unique four-stage filtration process.

Stage 1: Enclosed within the rotationally-molded housing is a disposable paper filter bag. This bag makes disposal and replacement clean and efficient.

Stage 2: For added filtration Cimex-USA used a bag-in-bag design. The paper filter is enclosed within a durable, reusable cloth filter bag.

Stage 3: Each of the two vacuum motors is filtered with an intake filter for a third stage of filtration.

Stage 4: A high-performance filter cartridge is located at the motor exhaust, ensuring clean-air performance.

The combined efficiency of these four stages of filtration delivers clean-air performance that will reward you with cleaner carpets and healthier environment.

Outstanding clean-air performance in a durable operator friendly machine.

If you are challenged with maintaining large carpeted areas, the 30" CXV30 Clean air Carpetkeeper delivers unmatched vacuuming performance. High efficiency cleaning performance, clean-air filtration, and a host operator - friendly features make this the perfect unit for malls, airports, hotels, convention centers, deepartment stores, and hospitals.

The CXV30 delivers uncompromising cleaning power in a truly user-friendly package. Two high-efficiency vac motors provide 224cfm, a four-stage clean-air filtration system removes particles down to 3 microns.

Storage made simple

The CXV30 handle folds down and the unit can be stood on end for storage. The clean, smooth design of the units undercarriage minimizes parts with the molded-in strength of the units body.

Professional performance
The CXV30 has a 30" cleaning path, four-stage clean-air filtration, and vacuuming performance that is simply unmatched by the competition.

The 1800 rpm brush loosens deep down dirt and revives carpet pile that gets compressed in high traffic areas. Robustly designed and constructed of rotationally-molded plastic, the CXV30 stands up to everyday rigors faced by today's cleaning and maintenance professional. Features include five-postion brush height adjustment, stainless steel brush shoe, deadman's safety switch, and large rear wheels for effortless transport.

Operator-friendly
Large carpeted areas mean extended operating times for the CXV30. An ergonomically-designed handle with cushioned grips and safety switch are standard.
