Retail Packaged Cups and Dinnerware

Insulated Beverage CUPS

Dart **Insulated Beverage Cups** are available in 1.25 through 20 ounce sizes. Because of their insulation, they act as "2 Cups in One," ideal for use with both hot and cold beverages. Packages are color-coded by cup size, with a prominent display of the package count to make customer purchase decisions simple.

Dart 6.4 and 8.5 ounce **Easy-to-Hold Insulated Cups** feature a ribbed sidewall design, providing extra strength and a secure gripping surface.

Our 12 ounce **Holiday Cups** help increase sales and profitability during the holiday season.

Premium Plastic PLATES & BOWLS

A favorite among consumers, Dart **Plastic Dinnerware** features a "crystal cap" layer for a china-like finish and increased strength. The non-absorbent and cut-resistant surface keeps sauces from soaking through. To make handling simple, the decorative rim provides for easy product separation.

COORDINATED PACKAGING

The family appearance of Dart retail packages helps build customer awareness and creates a billboard effect for the Dart brand name. This opens the door to added merchandising opportunities for retailers. The vibrant package colors enhance shelf presence, resulting in increased impulse sales. Color-coded packages make product selection quick and easy for customers.

PRIVATE LABEL

To create a billboard effect for your own brand, consider a Dart Private Label. Any of Dart's product packages can be labeled as your own. Use your design, or have our design team create custom graphics for your cup and dinnerware packages. Contact your Dart Sales Representative to find out how you can take advantage of Dart's Private Label capabilities.

The Dart Story begins with a small machine shop in Mason, Michigan known as Dart Manufacturing Company. Established in 1937, this modest business prospered through the manufacture of such products as plastic key cases, steel tape measures, and identification “dog” tags for the armed services. Subsequent experimentation with expandable polystyrene in the late 1950s led to a line of high quality insulated foam cups, and Dart Container Corporation was born.

Consumers immediately recognized the benefits of foam cups over the then-popular paper hot cups, and sales took off. These benefits include superior insulation, strength, and durability – all provided at a better value due to Dart’s unrivaled proprietary technical innovations. Dart’s early success in the foam cup market was further fueled by its commitment, still evident today, to providing our customers with excellent service and products of consistently high quality.

Succeeding years saw new lines (e.g. plates, hinged containers, bowls, food containers, cutlery) added to the Dart product mix. Today, Dart manufactures a broad range of quality single-use products for the foodservice, retail, and food packaging industries, and is the world’s largest manufacturer of foam cups.

In order to ensure that we provide our customers with consistent product quality and a dependable source of supply, Dart:

- manufactures most of its own production equipment and raw materials;
- turns those raw materials into finished goods;
- then uses Dart trucks to deliver our finished products to points “across the globe.”

Our pledge to customer satisfaction does not end with the sale. Dart has been at the forefront of efforts to recycle polystyrene foam foodservice products, and to inform government, customers, and the public of the facts about polystyrene foam.

Top to bottom, Dart stacks up as the industry’s proven leader in providing quality, service, and convenience.
