- Increased Productivity
- Superior Construction
- Simple Design
- 30" Grinding Width
- Transport Wheel
- Emission Shut Down System
- Enclosed Grinding Deck
- Non-marking Splash Guard
- Adjustable Handle
- EPA & CARB Approved

The LX – 30 Propane Powered Grinder and Polisher. It utilizes three 13" counter rotating heads, with either 9 or 12 diamond discs. A hefty 700 lb. of concrete grinding muscle, taking concrete surface prep, grinding and polishing to new levels.

No need to pay for an onsite generator to power your equipment. Propane fuels the 22hp Subrau Robin engine that is certified to meet EPA and Carb emission standards. Comes with an **Emission Shut Down System** for your safety, and a clean burning catalytic muffler.

Wet grinding features include an 8 gallon water tank. For Dry Polishing 2 vacuum ports. Instead of multiple diamond changes, only three pre-loaded quick change plates are needed for each grit.

Cut That Cord with the LX-30

LX-30 Grinder Polisher	
Production	800-900 sq.ft. per hour
Engine	Robin 22hp (653 cc)
Engine Speed	3,200 rpm
Drum Speed	1,410 rpm
Head Speed	840 rpm
Grinding Pressure	500 lbs
Grinding Diameter	28
Box Dimensions	L80 xW38 xH55
Shipping Weight	950 lbs
<i>All STONEKOR equipment are EPA and CARB certified for exhaust emissions.</i>
