

*Equipment solid
to the KOR*

- Passive planetary drive
- 3 Floating Heads
- Center feed water system
- 10 gallon water tank with solenoid valve system controlled at operator position
- No torque
- Heavy duty wheels
- Enclosed belt and pully system Vacuum port

Rejuvenator 3000

The **Rejuvenator 3000** is powered by the Kawasaki FS 603cc engine with auto emission shut down, three way catalytic muffler to lower emissions (CO, HC and NOx) Meets all OSHA and EPA standards.

The Key to restoring worn or damaged polished floor is to limit the number of steps in the polishing system. This is similar to sanding a floor but using hy-bird and resin diamonds to hone the floor and polish to a high gloss. The rejuvenator was designed for this process and is not a converted buffer. This is not to be confused with our true grind and polishing equipment that flattens and polishes. This system will reduce the cost of maintaining polished concrete floors. This system allows anyone with just a few hours of training to restore polished floors.

Designed and manufactured in the U.S.A.

Rejuvenator	
Production	11000 sq ft/hour(500 rpm) 15000 sq ft/hour buffing(800 rpm)
Engine Speed	2,900 rpm
Pad Speed	500 - 800 rpm
Pad Size	Three 12" Counter Rotating
Total Weight	505 lbs
<i>All engines exceed Environmental Protection Agency (EPA) and California Air Resource Board (CARB) regulations for exhaust emissions.</i>	

Made in the U.S.A
