

## INNOVATIVE FEATURES:

- A robust "one-touch" handle adjustment. No bending is ever necessary to adjust the handle height – it's all done right at the switch box. The piston lock at the bottom is actually stronger and more durable than the friction locking device used on most floor machines.

- An industry-first ambidextrous safety lockout, which makes starting the machine with either hand easy.

- A solid steel switch lever, which is almost impossible to break. Never buy a replacement switch lever again.

- An integrated cord wrap, to keep the heavy-duty industrial power cord stored securely.

- A non-marking bumper to protect walls and baseboards from marring.

# THE INDU BEST FLOOR

### UltraGlide™

This 1 HP floor machine features a dual planetary gear transmission and a 25' power cord. At 175 RPM, the UltraGlide™ is perfect for stripping wax floors, scrubbing tile, and other hard surface cleaning tasks.

### PowerGlide™

The PowerGlide™ series features a robust triple-planetary gearbox, as well as a 1.5 HP motor. This added power allows you to use the floor machine for additional tasks, such as shampooing carpets, bonnet cleaning, and screening wood floors. It's 50' power cord also gives you extended range.

# INDUSTRY'S BEST MACHINES

## DualGlide™

DualGlide™ machines are extremely versatile. Use the 175 RPM low speed setting for scrubbing and stripping. Switch to the high speed setting, and you can sand or dry polish at 320 RPM. Not recommended for shampooing.

## DiamondHead™

The DiamondHead™ can take on the toughest floor care job – The cleaning, honing, and polishing of stone and concrete surfaces. The super-duty motor is fan cooled to prevent overheating, and sealed to protect it from airborne dust and debris. The weight is perfectly balanced over the center of the pad to ensure an even polish. Weighted models are also available for those who need even more honing power.

Robust handle locking device - stronger than traditional locks.

Heavy duty shroud with shampoo tank feed.

Speed selection switch on DualGlide™ units.

Non-marking heavy-duty wheels.

Optional weighted plate for DiamondHead™ units.
