

# Mytee® Tech Alert

Changes to current machines

Vol. 25

## Mytee® Lint Hog™ upgraded

Mytee's® Lint Hog™ extractor debris filter has been upgraded with a new shape and features for both models. **These upgrades are being offered at no increase in price.**

Effective immediately:

- F200 and F250 Lint Hogs™ have been redesigned with a wider, ribbed body to provide more strength under pressure and allow for better airflow.
- Customers can choose the model that meets their vacuum hose needs – the F200 with two 2” inlets or the F250 with two 2.5” inlets.
- The following items will be included with each Lint Hog™ ordered – stainless steel filter, two Mytee® Cuff-Lynx™ hose connectors, a package of o-rings, and a package of 25 nylon Piglet™ Filters, which line the Lint Hog™ to increase extractor protection even further.

The Lint Hog™ protects extractor vacuum motors from lint and other debris commonly found while cleaning carpet and upholstery. Just place it between two vacuum hoses leading to the extractor. Its stainless-steel mesh filter captures debris before it reaches the pump impeller, preventing damage, downtime and repairs.

The purpose of the MTA (Mytee® Tech Alert) is to provide the latest news from our technical department to keep you up-to-date and to inform you about changes in our product line. This information will ensure that our distributors/partners have the most up-to-date product information. Mytee Products Inc., would like to thank our vendors, distributors, and professional carpet cleaners whose input and suggestions were valuable to these changes.
