Tempo™

Don't let spots become stains!

When a spill happens, it is vital to get to it quickly before it sets in. With this little powerhouse, you can set up, clean up, pack up, and be back at your business in just minutes.

The unit comes complete with an 8' hose and a tough stainless steel hand tool – not the flimsy plastic tools offered by many competing spot cleaning units. The Tempo™ also features the strongest vacuum motor in its class, which helps reduce dry times.

The lightest extractor we make – at only 20 pounds, it's a breeze to move, carry, and store. With its integrated carry handle, it won't be long before the Tempo™ becomes your first choice for spot and spill response.

Tempo™

Sub-compact machine, full-size performance.

Perfect for the occasional detail job, or for the serious home detailer, the Tempo™ packs a lot of power into a small package. At only 1.5 gallons, this light machine can be easily carried in one hand. It sets up in seconds, and operates on a single convenient switch.

However, it's small body can be deceiving. This unit has the most powerful vacuum motor in it's class, allowing you to perform a deep and thorough cleaning of mats, upholstery, and carpets. It also features a tough stainless steel hand tool, which will outlast the plastic tools used by many of our competitors.

It's easy to fill and empty, with clear view tank lids that let you see what you are extracting. You can even fill the Tempo™ with warm tap water for best results - it's pump system was designed to handle it. At only 20 pounds, you'll find that the Tempo™ takes a load off your back, without taking a load out of your wallet.
