

# TRADEWIND™

## AXIAL FAN

## THE DEHUMIDIFIERS BEST FRIEND!

The new Tradewind #3000 axial fan produces up to 3000 CFM, and is perfect for water damage restoration. The motor features 2 running speeds, allowing you almost unlimited versatility. Optional accessories include a multi-position stand, for eight different drying positions.

With the  
**TRADEWIND™**  
you'll enjoy these  
MYTEE advantages:

- **VERSATILITY** •

The Tradewind can be used for drying, tile, drywall, hardwood floors, baseboards, ceilings, and more.

- **PERFORMANCE** •

The Tradewind puts out over 3000 CFM on the high speed setting, giving you all of the power you need to tackle large jobs. The optional drying stand (item #3002) allows it to be used for drying in eight different positions.

- **CONVENIENCE** •

The Tradewind features a space conscious design, which allows the units to be stacked either vertically or horizontally. The optional transport handle (item #3003) can be used to easily wheel the airmover from job to job.

- **EFFICIENCY** •

On high speed, the Tradewind uses only 2 amps of power on a standard 115 Volt circuit. It features a built in daisy chain outlet. This allows you to run up to 6 airmovers on a single 15 Amp power circuit (18,000 CFM total). Drop the amp draw even lower by utilizing the low speed setting

- **SAFETY** •

At Mytee, safety is built in! The power cord is a bright safety yellow for visibility. The airmovers have built in circuit breakers, as well as, a GFI outlet to protect against unexpected power spikes or shorts.

**MYTEE . . . BUILT TO LAST!**
