The ULTIMATE Multi-Purpose Tool!

Tile, Granite, Hardwood - even Stone Polishing...Square Scrub® embodies Multi-Purpose!

With over 100 types of pads, plates, screens, papers and diamonds available, there is a tool available to help you tackle virtually every floor type. Got a marble floor in desperate need of some shine? Use our stone care diamonds. Want an easier way to remove all of that carpet glue? The Abrader Plate tears right through it. Even small problems like removing gum from concrete can be solved with Square Scrub®. Our 16 Grit Pro Sandpaper works great for that! Wet or Dry, whatever your need, we've got the right tool for any job and a machine that can do it all. **Now THAT is Versatility²!**

POINT. SQUEEZE. GO.

800.557.6822 | www.squarescrub.com

EASY TO LEARN

Intimidating? Nope.

Let's face it, some of the machines out there look like you need a specialized certification to run them. Not with the Square Scrub®. Not only is it easy to operate but every process is simple and straightforward. Anyone can do it! Even if you've never operated a floor machine, just visit our website for step by step instructions and how to videos and you are on your way to beautiful floors!

Got an iDevice?

Stone Polishing with Square Scrub

Square Scrub® has spent hundreds of hours perfecting the Stone Polishing process. Combined with informative “How-To” videos and documentation readily available on the Square Scrub® website, diamond polishing has never been faster or easier.

Vacuum Braided Diamonds

The Square Scrub® vacuum braided diamonds are designed to remove finish from stone surfaces. These extremely aggressive diamonds should not be used in daily or routine maintenance, but excel in removing finish from Terrazzo and Marble.

Four bars per grit are required for stone care.

Grit	Part No.
30 Grit	SSVBM030
50 Grit	SSVBM050
100 Grit	SSVBM100

For a complete list of what you will need to polish Terrazzo - visit www.squarescrub.com/literature for a detailed “How-To” checklist.

1500 Grit	SSGD1500R
3000 Grit	SSGD3000R

Resin Diamonds

The Square Scrub® complete line of resin diamonds makes efficient work of any polishing project. Designed with efficiency in mind, the chevron shape maximizes coverage so you can move on to the next step and on to your next Square Scrub® project.

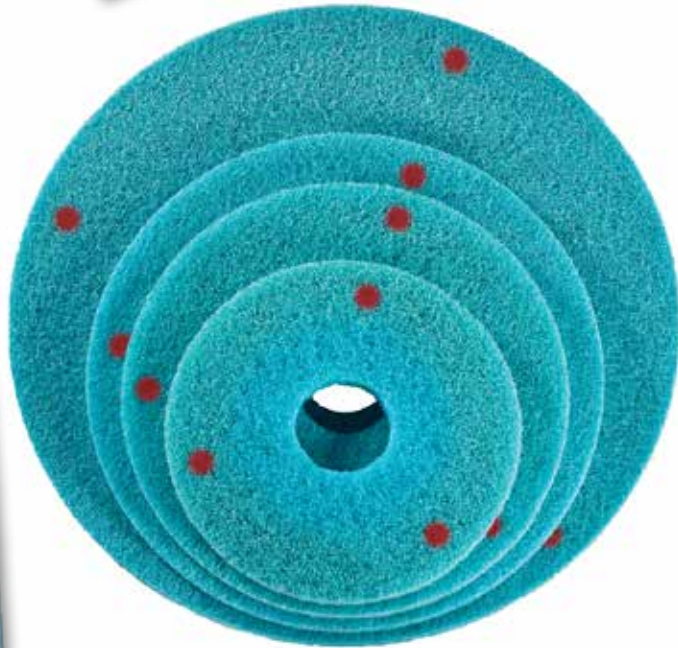

Four bars per grit are required for stone care.

Square Diamond PolyPads

Our diamond polypads, available in 0800, 1500, 3000 and 6000 grit for both 20" and 28" machines, take "shine" to a whole new level. Use in a daily stone maintenance program to retain a high gloss. Produces up to 50,000-100,000 sq ft per pad. Sold individually or by the case.

200 Grit	SSTD0200
400 Grit	SSTD0400

“Toolip” Diamonds

The long-lasting metal “Toolip” (pronounced “tulip”) diamonds from Square Scrub® are there for the heavy work. Each bar is 19” in length, making it necessary for just two bars for each grit. Aggressive and durable, these diamonds will grind paint off concrete while exposing the “salt-and-pepper” look in your concrete surface. All metal diamonds will need two bars per grit. Always use metal diamonds wet.

Square Densifier SSSDENSE5

The ultimate blend of reactive silicates and active surface agents for use with polished concrete systems. It will harden, strengthen, increase resistance to stains and preserve the polished surface of your concrete. Apply densifier after completion of the 200 grit pass. Be certain to remove any excess that has not dried in 30 minutes. One gallon will cover up to 750 sq ft.

Square Guard SSSGRD1

A specially blended polymer that provides stain resistance for concrete. Square Guard allows concrete to breathe through a tough, long wearing, repairable surface. Apply after completing the 800 grit step. Each one gallon bottle will cover up to 2000 sq ft.

Machine shown with the Solution Tank and additional weights. See page 12 for more information on the Square Scrub® Solution Tank.

Machine shown with additional weights

Proud to be an American!

An American Made product, that is.

We don't mean to brag, but we're pretty sure no one else can say that their machines are truly American Made. We can!! The 10 gauge steel used in our frame comes from Arkansas. That same steel is fabricated just a few minutes from our factory where the machines are assembled by hand. The Leeson motor is made in Black River Falls, Wisconsin. We believe in American Made products and the opportunities created by supporting American companies. That is why we make every effort to incorporate components that are made right here in the good old United States of America.

Quality Control

Every machine we build is quality tested and inspected.

We care about the reputation of American Made products so we strive to build a sturdy, hard-working, solid machine that is **BUILT TO LAST!!**

Fast Delivery

Time IS money.

At Square Scrub® - we know that your time is valuable. Our machine is designed to save you time, affording you opportunities to make more money. We know that you don't have time to wait weeks for your machine. That is why we strive to fulfill every machine order within one day of receiving an order. For pads and accessories, we do our best to get them out to you the next day so you can get to work ASAP!

CRAFTSMANSHIP

Reduced Vibration

Square Scrub® strives to make your day easier.

When implementing this latest feature, we considered the impact that vibration makes on your hands and even your body over an extended period of time. A little bit of vibration is to be expected of course, but we thought why not dampen that vibration as much as possible to reduce fatigue and offer you, the user, the ability to keep on working. Whatever project you decide to work on next, know that we have done all we can to make your day easier.

Vibration Reducing Isolated Handle

NEW!! High Output Grip Face

Get a Grip

Less Cost. Even More Versatile.

Our **NEW** Grip Face allows any tool to adhere even better to the machine - Significantly reducing slippage. Reducing the slippage between the pad and the grip face causes less friction between the pad and the plate. This allows more power transfer to the work surface and reduces pad wear. Not only that, some of our products now adhere directly to the new grip face. No driver required*. Who wouldn't want to save money on drivers?

33 *Be sure to follow proper recommendations for accessory use. Visit www.squarescrub.com for more information.

21 lb Weights-Slotted

Adding additional weight helps the machine penetrate thick finishes and polish stone surfaces. The 21 lb plate is a great way to effectively and safely add additional weight to your machine. Important! These weights can only be fitted to machines that currently have slotted weights. For existing machines with Drop Weights, please use part No. SS142009D.

Part No.
SS142009S

Relocated Base Hose Cuff

Even/Adaptable Weight

Adjust the weight of the machine to suit your application.

With Square Scrub®, changing from floor type to floor type is easy with our NEW Slotted Removable Weights. Well really, it's more of a twist on an old favorite. We've added the slots to make it even easier to add weights for stone polishing or hardwood floor sanding and remove weights to clean the carpet in the room next door. Our EBG 20/C can adjust to accommodate up to a total weight of 329 lbs. That's a lot of added prepping power! We've even relocated the Base Hose Cuff to allow for ideal weight distribution. Ideal weight distribution = the most even pad to surface contact.

You Deserve the Best!

Confidence

You deserve a machine that will partner with you to tackle any job that comes your way. A sort of "Right-Hand-Man" if you will (or woman of course). You deserve a reliable teammate that won't let you down on the job.

The Square Scrub® EBG Floor Preparation Machines are just that. These machines are well built with your work day in mind. They are sturdy and safe. As a matter of fact, our machines are ETL/CSA/CE certified. So you can work with confidence, knowing you are using a safe machine.

It takes months and months of rigorous testing to become ETL/CSA/CE certified. But to us, it is worth the added effort to make sure that when someone uses our machine, they have a machine they know they can count on.

Who would want to use any other machine?

EBG Series Surface Preparation Machines

The One You Want.

Are there other machines out there? Yes. Could they handle some jobs? Could you "get by" with those other machines? Maybe?

Will they get the job done, do it well AND make your job easier? Are they the one you need? Are they the one you want? NO!

At Square Scrub®, we don't want you to settle for any machine. You need a machine that will partner with you to get the job done. One that will step up and tackle any project that comes your way, both quickly and efficiently. A machine whose versatility will offer opportunities for your business to grow and expand.

With removable weights that can be adjusted to a maximum weight of 329 lbs., easy transport, and over 100 types of pads, plates, screens and brushes, the Square Scrub® EBG Series Surface Preparation machine is not only the one you want - it's the one you NEED.
