

CORELESS ROLL CAN LINERS

Performance you can Trust.
Quality you can rely on.

FUTURA™ SUPER HEXENE HAO

IDEAL FIT™ SIZED-TO-FIT SUPER-HEXENE HAO

TERRA™ LINEAR LOW DENSITY-LLDPE

TERRA RENEW™ BLENDED-RECYCLED-LLDPE

GALAXY™ HIGH DENSITY-HMW-HDPE

Futura™

Futura™ liners work in a wide variety of applications, including disposal of heavy or sharp objects, and wherever maximum puncture and tear resistance are needed. And because they are manufactured from thinner, stronger films for maximum source reduction, Futura liners are an environmentally responsible choice.

FEATURES

- Ultra-tough performance, thanks to Super Hexene 100% HAO resins.
- Maximum strength, for superior puncture and tear resistance.
- Thinner, stronger films reduce landfill waste up to 25%.
- Seamless tubular construction with leak-proof star seal.
- Wide range of sizes in White, Clear and Magnum Blue.
- Suitable for heavy, irregular waste – in gauges from 0.51-2.50 MIL.
- Coreless rolls for ease of use and storage.

Super Hexene HAO Can Liners

Futura liners are among the toughest in the industry—up to 50 percent stronger than other bags of the same gauge. The result: better performance at lower cost. These liners are also a smart choice for environmental source reduction: Advanced film technology reduces plastic waste by up to 25 percent with absolutely no sacrifice in performance. Even the carton is environmentally friendly... inks used are water-based and the cartons are manufactured from 60 percent recycled content.

Ideal Fit™

Ideal Fit™ Super Hexene HAO container-matched liners end costly fit problems, while providing an unbeatable combination of performance, environmental source reduction and cost efficiency. These versatile liners can be used in a wide range of applications, including disposal of heavy or sharp objects, and wherever maximum puncture and tear resistance are needed.

Sized-to-Fit Super Hexene HAO Can Liners

Ideal Fit HAO liners deliver a perfect fit every time...they're never too big, so there are no more time-wasting bag tie-offs. And never too small, so there are no more liner cave-ins or messy clean-ups.

These liners are a great choice for environmental source reduction, too: Thinner, stronger Super Hexene HAO films reduce plastic waste by up to 35 percent. And by eliminating wasteful liner overhang, extra bag width and costly double bagging, less plastic waste ends up in landfills.

† LLDPE

Specifications subject to change without notice.

FEATURES

- Ultra-tough performance, thanks to Super Hexene 100% HAO resins.
- Thinner, stronger films reduce landfill waste up to 25%.
- Available in Clear and Magnum Blue.
- Great choice for environmental source reduction.
- Ideal fit everytime...reduces waste.

Less film, less waste, less cost. These are the benefits that come with every container-matched Ideal Fit liner. And because these designed-to-fit liners are 50 percent stronger, they'll outperform comparable linear low density bags day-in and day-out in virtually every application.

23-gallon SJ receptacle

Terra™

Terra™ bags offer dependable performance and are a great, all-purpose solution for industrial, commercial, and institutional applications. Ideal for everything from paper and general refuse to heavy or sharp objects.

Linear Low Density LLDPE Can Liners

When you've got a heavy load, you need a bag that will stand up to the test. Terra bags pass with flying colors – no leaks, no tears, no punctures. Just superior performance that's suited to a variety of industrial applications. The result: you get better performance at a lower cost.

Terra Renew™

Terra Renew™ liners are made from recycled materials, so they're an environmentally better choice. Perfect for cost-conscious users looking for a thick bag suited to heavy-duty applications like sharp, heavy or irregular waste.

- ### FEATURES
- Made with high-quality blended resins that meet or exceed EPA guidelines for 10% Post-Consumer Content.
 - Super tough – great puncture and tear resistance.
 - Seamless tubular construction.
 - Leak-proof star seal.
 - Designed for extra heavy-duty use – available in 1.00 to 2.00 MIL.
 - Wide range of sizes.
 - Available in Black.
 - Coreless rolls for ease of use and storage.

Blended-Recycled LLDPE Can Liners

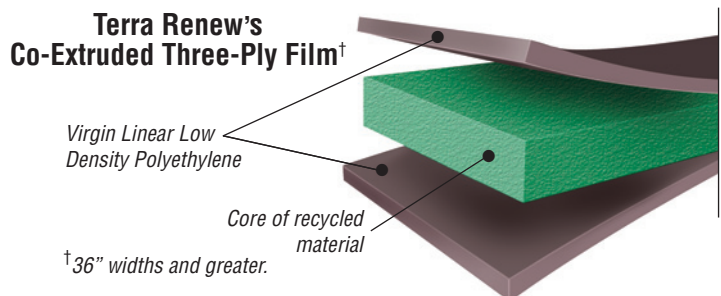

The EarthCare® seal indicates that Terra Renew liners meet or exceed EPA guidelines for 10 percent Post-Consumer Content. They're made from a combination of Post Consumer and Post Industrial materials.

And here's more good news: you don't have to sacrifice performance to make an environmentally sound choice. These liners deliver strength and thickness equal to your toughest applications. Even the carton is environmentally friendly...inks used are water-based and the cartons are manufactured from 60 percent recycled content.

Galaxy™

Galaxy™ liners bring outstanding performance and environmental source reduction to a wide range of waste-containment needs, including foodservice, commercial and institutional applications. These liners easily handle non-sharp, heavy, wet waste, provide highly effective odor containment and are an environmentally sound choice.

High Density HMW-HDPE Can Liners

Gauge for gauge, Galaxy liners handle heavier loads at a lower cost versus competitive bags made from less-advanced films. These liners also promote environmental source reduction—thinner, stronger films mean less waste going into incinerators or landfills.

The result: you get better performance at a lower cost while promoting environmental source reduction.

Galaxy™ High Density High Molecular Weight HMW-HDPE: Natural, Black

FEATURES

- Made with HMW-HDPE resins using our exclusive manufacturing process.
- Maximum strength and load capacity.
- Great chemical resistance and odor containment.
- Wide range of temperature resistance.
- Leak-proof star seal.
- Wide range of sizes.
- Available in Black and Natural.
- Coreless rolls for easy use and storage.

Container Reference Guide

Picking your can liner is easier than ever. Triple S offers a wide variety of can liners for every type of trash. Find your receptacle on the left and then choose the can liner film that works best for your application. It's as simple as that.

	Container Name	Rubbermaid® SKU	Gallon	Standard Liner Size	IDEAL FIT™ Super Hexene (HAO) <i>Sized-to-fit your container, a perfect fit everytime. Exceptional puncture and tear resistance.</i>	FUTURA™ Super Hexene (HAO) <i>Our "best" can liner film...excellent puncture and tear resistance...handles heavy/sharp waste.</i>	TERRA™ Linear Low Density (LLDPE) <i>All-purpose liner... for paper, general refuse and heavy/sharp waste.</i>	TERRA RENEW™ Recycled (Blended LLDPE) <i>Recycled content... a thick, economical, heavy-duty can liner.</i>	GALAXY™ High Density (HDPE) <i>Superior strength and load capacity for its gauge... handles heavy, wet, non-sharp waste.</i>

Keeping our Promises, Earning your Trust

Experience at work...Triple S liners reflect four decades of experience working directly with facilities professionals like you. That's why—from lightweight liners used in offices, to super-strong trash bags for industrial waste—our liners deliver superior real-world performance with quality and value you can trust.

Strength in every bag...Gauge-for-gauge, our liners are stronger than others – a performance edge you'll find throughout our product line-up: Sized-to-fit liners perfectly matched to your container; bags that stand up to heavy, sharp waste; multi-purpose liners that meet both performance and environmental goals.

Help you can count on...Triple S liners come with another built-in advantage: Your Triple S distributor, who you can count on to help you choose exactly the right liner for every waste containment need. Buying with confidence also means getting what you pay for – every time. With Triple S liners, what's printed on the box is in the box.

Toward a "greener" world...Many of our liners carry the EarthCare® seal, which designates products offering significant features contributing to environmental sustainability. These products meet "green" standards from recognized organizations, such as EPA. Look for the EarthCare seal when you want to create healthier places to work, live, learn and play.
