PT System

Why pay for a pad when you can get Pro
The Production Tool System is uniquely
manufactured to specific tolerances
grit and mesh design. As a result
one meets and exceeds the performance
demands of floor care in respect to
machine and surface requirements.
Because they work faster and last
longer, these tools save labor time and
money while they do the job more
other jobs by letting these Pro

PT 2000

The only similarity the PT 2000 has with other stripping pads is that they are round! No pad works like it and no pad feels like it. The PT 2000 sets the new standard by which others will be judged. Heavy, 500 denier fiber, aggressive binder and super saturated grit combine to create an industrial strength tool that defies comparison. Don't waste precious time grinding one tough area. The PT 2000 cuts through faster to reduce this budget busting, labor intensive process. Hold one in your hand and you'll feel the difference. You can expect more productivity using this demanding Performance Tool. Try it now and you'll see an immediate labor savings.

Stripping Boots

Practical in numerous ways, stripping boots keep harsh chemicals off your footwear and allow spot cleaning in corners and other areas without extra tools. Replacement soles are made from stripping pad material and help prevent slipping on wet surfaces.

Product that pays for itself.

PT 3000

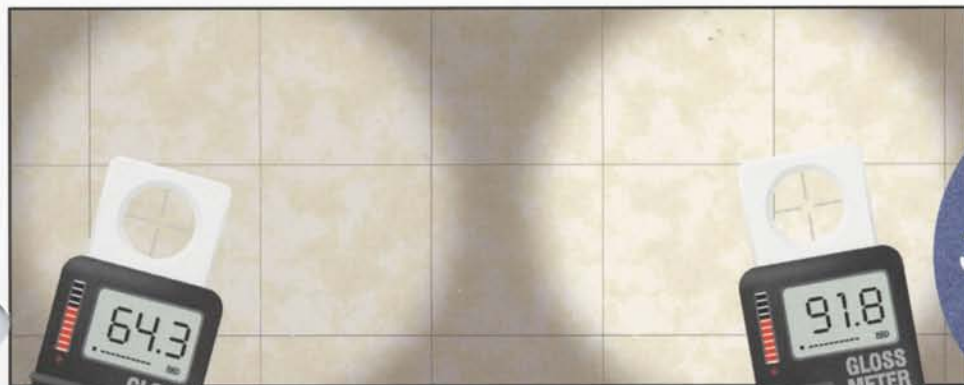

Want to extend the life cycle of the floor and reduce time-consuming top scrubbing, recoating or stripping? This Production Tool is the supreme choice for softer finishes. PT 3000 can be used on medium to hard finishes as well. Versatile, this one tool works with electric, battery and propane. The PT 3000 quickly restores the shine thus eliminating the manpower and material costs associated with recoating for one or more extra cycles. You can actually calculate the savings when you use this Production Tool.

"Extensive field studies have proven that the PT 3000 gives greater gloss meter readings than our competition."

Complete your floor maintenance PT System with these quality pads...

Aqua

A superior soft pad that lightly polishes the floor for an excellent, reflective appearance. Made of unblended virgin polyester, this pad is durable and resilient.

UHS Tan

Especially effective on medium to hard finishes, this pad produces an unsurpassed wet look gloss. This color is especially selected to avoid dye transfer.

Natural Fiber

For a medium to hard finish, natural fiber pads outperform hair pads and leave no lingering protein odor. The light touch of the pad combined with natural oils from the fibers burnish out scratches while removing less of the top coat. The result is more shine with less frequent waxing. This pad may also be used for spray buffing.
