Clarity in Cleaning

NBV 220

With a noise level of only 45 dB(A), the NBV220 is excellent for daytime cleaning or cleaning any congested or occupied public areas. Cord-free operation improves productivity significantly and eliminates accidents commonly associated with power cords such as tripping over them or getting electrical shocks due to improper care. With a 3-gallon tank the NBV 220 offers plenty of capacity.

The 250-watt vacuum motor coupled with run time of 45 minutes ensures plenty of power to get the job done; the battery provides stable power over the entire discharge. The 36-volt lithium ion battery charges in 2.5 hours. The on/off switch and battery status are conveniently located on front of the machine for the operator to see at all times.

When equipped with a HEPA-FLO bag, the filtration is 0.3 micron @ 99.97% efficiency, improving indoor air quality and reducing dust in the building.

At 20 pounds, the NBV 220 incorporates all features of our popular and very innovative PVR 390 vacuum including a structural foam tank for durability and built-in cart allowing easy transport of a second battery should it be required.

On-board storage

Lithium-ion batteries

MODEL

NBV 220

| | |
|-------------|----------|
| Motor | 250W |
| Run Time | 45 min. |
| Charge Time | 2.5 hrs. |
| Water Lift | 45" |
| Airflow | 50 cfm |

| | |
|----------------------|--------------------------|
| Standard Filtration* | 99.97% eff. @ 0.3 micron |
| Capacity | 3 gal. |
| Weight | 19.5 lbs. |
| Noise Level | 45 dB(A) |

* Meets HEPA spec for non-hazardous recovery and exceeds LEED-EB spec
