

TRIPLE S Deep Scrub Floor Prep Pad

Performance Meets Sustainability

Improved Safety, Increased Productivity and Environmentally Preferable

The SSS Deep Scrub Floor Prep Pad uses just plain water to remove acrylic floor finish and leave a clean surface ready for recoating. No harsh stripping chemicals are required, making it a more sustainable, productive and safer option than conventional stripping processes. Use on a variety of coated surfaces including VCT, vinyl, terrazzo, marble and concrete. (10/case)

Floor Preparation Process

1. Dust mop floor with SSS Microfiber Mop Pad.
2. Install SSS Deep Scrub Floor Prep Pad on autoscrubber, swing machine, or rectangular floor machine with a flexible backer pad such as SSS Red Buffing Pad.
3. Wet scrub floor until clean using water or SSS Neutral Floor Cleaner.
4. Pick up solution with mop or vacuum.
5. Dust mop with SSS Microfiber Mop Pad.
6. If Neutral Cleaner was used, rinse floor with water.
7. Allow floor to dry before recoating.
