PRODUCTS

Your Ultimate Choice in
Profitable Cleaning Performance!

LIGHTWEIGHT. COMFORTABLE. QUIET. POWERFUL BACKPACK VACUUMING FROM SANDIA PRODUCTS

The 10-Quart Raven Backpack is available in multiple powerful models. There is a Raven Backpack perfect for every job. Its unique filtration design provides the cleanest exhaust air – ideal for vacuuming schools, office buildings and other large, high-traffic areas.

- Reliable Power
- Fastest Pick-Up
- Maximum Airflow
- Innovative Design
- Lightweight
- HEPA Filtration

RAVEN BACKPACK SERIES

by Sandia Products

Manufactured with
Pride in the U.S.A.

SEE THE BENEFITS of the Raven Backpack Series

- Fastest soil pick-up with high CFM airflow, making the Raven significantly more proficient than traditional uprights.
- Collects the most soils, leaving exhaust air cleaner with a disposable, heavy-duty paper micro-bag mounted inside a washable cloth shakeout bag.
- Lightweight ergonomic design, with a cushioned back-pad that fits the curve of any operator's back. The comfortable shoulder and waist belt design reduces fatigue, making work easier.
- Easy-to-reach On/Off power switch, quiet motor and 50-foot long safety power cord.
- 2 Lever-style latches lock the lid to the body and a static-dissipating vacuum hose securely threads into the backpack's lid, allowing for right and left-handed vacuuming.
- 5-piece tool kit included on select models.
- Lifetime warranty on roto-molded polyethylene tank. 5-years on electrical components and tools.

TAPERED VS. CYLINDRICAL

Compare the features. Compare the technology.

With three innovative design advances, the Raven has increased airflow, increased efficiency and has created the quietest vacuum in its class.

1) Increased Airflow: the Raven's deflector plate holds heavy debris away from the motor filter during use. It prevents the cloth bag from contacting the motor filter and reducing airflow.

2) Excellent Design: by tapering the vacuum body 3/4 inch per side, it prevents a bulging bag from contacting the body, allowing airflow around the bag.

3) Quietest in its Category: by adding 70 inches of sound deadening waffle foam material, the Raven is the quietest backpack vacuum available!

- A) Angled, Static Dissipating Vacuum Hose: keeps the hose out of the way.
- B) Vacuum Bag Deflector: keeps particles from tearing the vacuum bag.
- C) Bag Support Plate: keeps sagging, heavy bags from impeding air flow.
