

HIGH PERFORMANCE CARPET WAND

Triton Carpet Wand is the latest in carpet cleaning technology. It provides a lightweight and durable alternative to the traditional stainless steel wand.

The head of the Triton carpet wand is not only designed for higher air speed but also even/consistent airflow speed across the whole width of the wand head guaranteeing optimum water recovery.

Talk about durability, the wand shoe is made of UHMW plastic which has the highest impact strength of any thermoplastic presently made. The wand glides easily across the carpet and wears less because the UHMW plastic shoe also has an extremely low coefficient of friction. For example, it is significantly lower than Delrin and other Acetals.

The UHMW vacuum shoe is held securely to the wand head with just 3 screws but also removes easily for cleaning or service. It has a stainless steel handle grip with a foam cushion providing comfort and durability. The valve, fittings and solution hose are rated to handle portable or truckmount pressure and heat.

Weighing in at only 6.5 lbs., it is easier and less tiring to use, especially on those big jobs!

TRITON

CARPET WAND

Features & Benefits

- A very light handle weight and low center of gravity with total weight of 6.5 lbs
- UHMW wand shoe with a lower coefficient of friction
- The wand head creates a strong contact with the carpet maximizing recovery and requiring less operator down force on the wand
- Unique dual jet system eliminates the problem of overlapping contact between each spray pattern, common to other wands. This design allows the full pressure of each jet to impact the carpet fibers with powerful, uninterrupted agitation
- The wand tube is available in durable lightweight aircraft aluminum or titanium.
- Its unique metal/heavy clip design allows the operator to remove in seconds the entire spray tip manifold for service and cleaning

Specifications

| | |
|----------------------|--|
| Model | TR1-95015FS-A (200 psi), TR1-9501FS-A (500 psi) |
| Weight | 6.5 lbs. |
| Glide | UHMW Ultra-High-Molecular-Weight polyethylene |
| Spray Tube | Brass |
| Vacuum Tube | Aircraft Aluminum or Titanium |
| Spray Jets | Stainless Steel |
| Valve | 1200 PSI |
| Solution Line | 3000 PSI |
| Fasteners | Stainless Steel |
